

Is it right for you?
Ask yourself...

The Viterion® 100 TeleHealth Monitor

I have...

- Diabetes
- Heart Failure
- Blood Pressure
- Lung Diseases
- Post Traumatic Stress Disorder
- Cancer
- Substance Abuse Disorder
- Depression
- Other _____

In the past year, I have...

- Had more than two hospital admissions
- Visited the emergency room of a hospital more than two times

TeleHealth PROGRAM

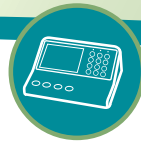

What is a TeleHealth Program?

It is an easy program, in which a Viterion® 100 TeleHealth Monitor is placed in your home to help you and your healthcare team monitor your daily clinical information.

This monitor forwards your daily health information to your nurse via your telephone line by dialing a toll-free 1-800 number.

Who is it for?

Eligible patients are those with chronic healthcare conditions such as diabetes, heart failure, blood pressure, lung disorders and mental health conditions.

What does it do?

Once placed in your home, the Viterion® 100 TeleHealth Monitor will provide closer and more frequent monitoring of your health conditions by your healthcare professional.

Benefits to Members, Their Families and Healthcare Professionals

- Promotes patient self-management
- Improves quality of life by reducing re-hospitalizations and emergency room visits
- Increases communication between the nurse and the patient and centralizes the coordination of care for better patient satisfaction
